

Engineering Technician

Job Details

Job Type: Full-time

Pay: Depends on qualifications

Hours: Monday-Friday, 8:00 a.m.-5:00 p.m. + possible overtime

Job Summary

Join the Homecrest Outdoor Living, LLC team as an Engineering Technician. In this position, you will be involved in various important engineering functions, including change control, document control, and industrial time studies. You will also participate in process improvement activities, process work instruction creation, and development of product routing structures.

Competitive starting wage with a full benefit package, paid time off, and opportunities for advancement!

About Homecrest

Located in Wadena, MN, Homecrest Outdoor Living, LLC is a leading manufacturer of outdoor furniture. Since our founding in 1953, our goal has been to enhance our customers' outdoor living experience by producing quality furniture that lasts for decades. In fact, many of our vintage wire collections from the 1960s are still in use today. If you are passionate about loving life outdoors, we want you on our team!

Job Duties

- Coordinate new product and product changes with the design engineering team. Administer and oversee the engineering change process throughout the organization.
- Embrace continuous improvement and Lean principles, and take a lead role within the engineering team to seek out and evaluate automation opportunities and productivity improvements.
- Participate in the product planning and tooling processes. Become an integral member of the product development team as it relates to process routing, structure creation, and process development.
- Update routings and bills of material as needed, complying with engineering change rules and processes.
- Develop and document process documentation, including hang methods in paint, in-process quality checks, process instructions, and alerts.
- Coordinate and collaborate in new soft goods component development, working with the soft goods production team and design engineering resources to develop most cost-effective designs.
- Test all fabrics and maintain all fabric cutting databases, including feature/option structures, cut files, cut categories, and cushion ticketing data.
- Ensure a safe work environment for yourself and others, follow all safety rules and regulations, and demonstrate commitment to safety program.

Requirements

- Competency in SolidWorks or AutoCAD highly preferred.
- Exposure to Lean Manufacturing environments or practices highly desired.
- Competency in keyboard skills and Microsoft Office Suite programs such as Word, PowerPoint, Excel, and Access.
- A working knowledge of bill of material and process routing design. A working knowledge of Infor/XA is preferred.
- Ability to work independently with minimal supervision.
- Competent business math skills (algebra, compute rate, ratio, etc.).
- Effective verbal and written communication skills with ability to conduct presentations in front of groups.
- Ability to work effectively with cross-functional teams, including facility employees, supervisors, managers, and suppliers.

Benefits

- 401(k) matching
- Dental, health, life, and vision insurance
- Paid time off
